

**THE FIGHT AGAINST THE TOBACCO EPIDEMIC IS AT A CRITICAL STAGE. BOLDER, URGENT ACTION IS NEEDED.**

## **LUXEMBOURG**

### **HARM**

Every year more than 600 people in Luxembourg are killed by tobacco-caused disease, while more than 5,000 children and more than 116,000 adults continue to use tobacco each day. Comprehensive tobacco control policies, covering all forms of tobacco use, would reduce the death toll from tobacco, which otherwise would grow with each passing year. It will also help to ensure that the tobacco industry cannot run roughshod over the lives of the people of Luxembourg. We encourage tobacco control advocates to reach out to other development communities to strengthen their efforts in this mortal fight.

#### **DEATHS**

% caused by tobacco, 2010

**21.6%**  
OF MEN

Even though fewer men, on average, die from tobacco use in Luxembourg compared with other high-income countries, still 8 men are being killed by tobacco every week, necessitating action from policymakers.

**11.1%**  
OF WOMEN

More women, on average, die from tobacco use in Luxembourg compared with other high-income countries.

### **INDUSTRY**

The combined revenues of the world's 6 largest tobacco companies in 2013 was USD342 Billion, 89% larger than the Gross National Income of Luxembourg. The industry is a powerful force that does not fear the actions of nation states because its resources are often much larger.

### **MARKET**

#### **ADULT SMOKING**

% using tobacco daily, 2013

**30.2%**  
OF MEN

More men, on average, smoke in Luxembourg compared with other high-income countries.

**22.9%**  
OF WOMEN

More women, on average, smoke in Luxembourg compared with other high-income countries.

#### **CHILDREN SMOKING**

% using tobacco daily, 2013

**18%**  
OF BOYS

More boys, on average, smoke in Luxembourg compared with other high-income countries.

**17.4%**  
OF GIRLS

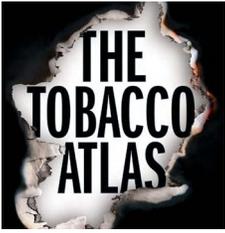

More girls, on average, smoke in Luxembourg compared with other high-income countries.

#### **SMOKELESS**

% currently using tobacco, 2013 or most recent

**N/A %**  
OF ADULTS

Because we do not know the prevalence of smokeless tobacco use in Luxembourg, future surveillance efforts must measure smokeless tobacco use prevalence in the population to help inform future tobacco control efforts.

# LUXEMBOURG

Tobacco control policy is an excellent investment in the health of a country's population. According to the WHO, for less than €7 per person per year Luxembourg will be able to pay for the four 'best buys' in tobacco control policy, raising tobacco excise taxes, enforcing a comprehensive national smoke-free law and a ban on tobacco advertising and promotion, and mandating large graphic warning labels appear on tobacco product packaging. This small investment will reap enormous dividends in health and prosperity.

## SOLUTIONS

Current Policy in Luxembourg
