

THE FIGHT AGAINST THE TOBACCO EPIDEMIC IS AT A CRITICAL STAGE. BOLDER, URGENT ACTION IS NEEDED.

UNITED KINGDOM

HARM

Every year more than 115,650 people in United Kingdom are killed by tobacco-caused disease, while more than 129,000 children and more than 11.2 million adults continue to use tobacco each day. Comprehensive tobacco control policies, covering all forms of tobacco use, would reduce the death toll from tobacco, which otherwise would grow with each passing year. It will also help to ensure that the tobacco industry cannot run roughshod over the lives of the people of United Kingdom. We encourage tobacco control advocates to reach out to other development communities to strengthen their efforts in this mortal fight.

DEATHS

% caused by tobacco, 2010

21.7%
OF MEN

More men, on average, die from tobacco use in the United Kingdom compared with other high-income countries.

16.2%
OF WOMEN

More women, on average, die from tobacco use in the United Kingdom compared with other high-income countries.

INDUSTRY

The combined revenues of the world's 6 largest tobacco companies in 2013 was USD342 Billion, equal to 13% of the Gross National Income of the United Kingdom. The industry is a powerful force that does not fear the actions of nation states because its resources are often much larger.

MARKET

ADULT SMOKING

% using tobacco daily, 2013

23.2%
OF MEN

Even though fewer men, on average, smoke in the United Kingdom compared with other high-income countries, still 5,886,800 men smoke cigarettes each day, the sign of an ongoing and dire public health threat.

20.3%
OF WOMEN

More women, on average, smoke in the United Kingdom compared with other high-income countries.

CHILDREN SMOKING

% using tobacco daily, 2013

6%
OF BOYS

Even though fewer boys, on average, smoke in the United Kingdom compared with other high-income countries, still 53,000 boys smoke cigarettes each day, the sign of an ongoing and dire public health threat.

9%
OF GIRLS

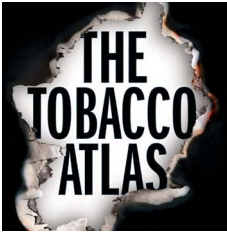

More girls, on average, smoke in the United Kingdom compared with other high-income countries.

SMOKELESS

% currently using tobacco, 2013 or most recent

1.1%
OF ADULTS

Even though fewer people, on average, use smokeless tobacco in the United Kingdom compared with other high-income countries, still 573,500 people currently use smokeless tobacco, the sign of an ongoing and dire public health threat.

UNITED KINGDOM

Tobacco control policy is an excellent investment in the health of a country's population. According to the WHO, for less than 50p per person per year the United Kingdom will be able to pay for the four 'best buys' in tobacco control policy, raising tobacco excise taxes, enforcing a comprehensive national smoke-free law and a ban on tobacco advertising and promotion, and mandating large graphic warning labels appear on tobacco product packaging. This small investment will reap enormous dividends in health and prosperity.
